

**CANNA**

The solution for growth and bloom

# CANNACURE

The Natural  
Way  
to Control  
Pests

- **MAKES PLANTS HEALTHY, VITALIZES LEAVES**
- **CONTROLS PLANT PESTS;**  
**WHITEFLY**  
**APHIDS**  
**SPIDER MITE**  
**MEALYBUG**
- **CONTROLS MILDEW**
- **STIMULATES PLANT GROWTH BY FOLIAR FEED**
- **NON TOXIC; CAN BE USED UP TO HARVEST**
- **IMPROVES LEAF COLOUR AND VIGOUR**
- **BIODEGRADABLE**

# CANNACURE

## CONTROLS PLANT PESTS

CANNACURE is CANNA's first environmentally friendly plant pests controller.

CANNA Laboratories has developed a multi task growth stimulator that:

- Controls plant pests by environmentally friendly physical means.
- Stimulates growth as a leaves nutrient.

CANNACURE ensures healthier plants, that concentrate on producing bigger flowers and increased yields.

## CANNACURE ADVICE

If you have a heavy infestation of, for example, whitefly, spider mite or mealybug, repeat spraying after 3 days and again if necessary after a further 3 days. Then weekly afterwards. In our experience heavy infestations of most of the common pests will not occur if CANNACURE is applied thoroughly to upper and lower leaf surfaces on a weekly basis from the early commencement of your plant to harvesting time. When you use CANNACURE, you are applying a foliar feed and comprehensive pesticide and mildewcide at the same time.

## HARMLESS

CANNACURE is very safe, can be used without intervals between spraying and harvesting. Like any other foliar spray it is always advisable to use appropriate clothing although CANNA Research Laboratories has not discovered any type of skin irritation. CANNACURE is biodegradable and can be used on edible as well as ornamental crops.

## MAGIC HIGHER YIELDS USING PK 13/14 & CANNABOOST

CANNACURE makes and keeps your plant healthy, shiny and clean, enabling optimal photosynthesis. This enables your plant to concentrate on flowering. Combining with CANNABOOST, fruits form more rapidly. The availability of nutrients is very important for achieving optimum results. CANNACURE combined with CANNABOOST, PK 13-14 and your regular CANNA feeding guarantees the best availability of all the nutrients.

## BETTER GROWTH AND PROTECTION

Together with your other CANNA-nutrients and additives CANNACURE ensures the plant also has sufficient energy-levels available to resist any pathogens. Mixing different nutrient brands always endanger your plants health. This may result in a lack of plant energy which gives diseases more chance to strike at crucial moments for your cultivation.

## THE PESTICIDE THAT DOES NOT WORK AS A PESTICIDE

Environmental footprints are becoming more important each day. What do we leave the planet with after we have harvested? How do we prevent all toxic pesticides to penetrate the earth? By using CANNACURE you are not only ensured to get the job done enabling high results, but on top of that it will not harm the environment and your own health.

CANNACURE works by means of physical action. It defends your plant against pests and mildew, by providing the leaves a second natural skin, that makes it impossible for pests and mildew to function properly.
